Many of the inflatable hot tubs are constructed as a one piece pvc design without any outer covering. This type of construction will offer no protection against accidental damage or insulation against the elements. Our hot tub has a reinforced heavy duty vinyl outer cover to ensure the pvc inner is fully protected from any accidental damage whilst protecting it from the elements. The addition of the outer cover also benefits the insulation of the hot tub and cosmetically gives it a fantastic high end quality look and finish. Always look at the depth of the spa. If it's below 26" the water level will be at least 6" below.. Our spa range go up to 29" deep which will allow you to sit down and have your shoulders under the waterline to take full advantage of the spa jets. Always check out the blower and heater. A good quality blower and heater are essential if you want that hot tub experience. If its underpowered there will be less bubbles and take longer to heat. Our mothership is a completely sealed quiet operation unit. The high output W heater combined with a circulation pump and Watt turbo blower, producing greater pressure for the air jets whilst maintaining the heat within you hot tub. Check out the number of jets. More jets does not equal more bubbles or more power. Too many jets will have an adverse effect meaning far less pressure. Some inflatable models have a cleaning filter attached internally to the hot tub. This impedes into the seating area giving less room to sit and subsequently is unhygienic when removing for cleaning as this will need to be accessed directly through the waterline. Our filter is separately housed within the mothership control unit giving external access for trouble free maintenance. DO NOT buy any inflatable spa without a good quality lockable cover. Safety is paramount and access into your hot tub should only be with the consent of a responsible adult. Without a cover you will leave your hot tub open to the elements. Don't throw your money away by heating the air! Our supplied cover has ultra secure lockable straps, so you decide who has access into your hot tub. Our 6" thick cover with 6" deep skirt will keep your hot tub protected and insulated. There are other models that have a cover that sits internally resting on the waterline. This just gives a constantly wet cover and allows dirt and debris picked up when the cover is off the spa to be transferred back into the water when you put it back on! If the cover sits on top of the hot tub without a skirt bridging the gap between the hot tub you will have excessive heat loss. Take a look at our cover.. Our 6? Buy from someone who sells everything on the planet and chances are you will have no back up for spares or dedicated after sales service on your product. Grand Rapids V2. Seating capacity:. control system - 3 Speed jet function. Cover Lifter:. As with all hot tubs it is important to check and ensure the chemical level in the water is correct and the filtration is doings its job. Simple regular checks can be made on the water using Test Strips which will show any adjustment required in the PH or Chlorine level of the water and just by adding a small amount of the correct chemical will keep your water nice and clean. All hot tubs will require a filter to capture unwanted debris and are essential in maintaining the water flow by keeping the pump working to its correct capacity. The filter should be taken out and cleaned on a regular basis and therefore it is recommended to have a spare filter to hand so your spa is constantly protected. Unlike hard shell spas the inflatable hot tubs do not have moulded seating so always a nice touch is to take a look at some water inflated cushion seating for extra comfort or jut as a booster for the kids. Canadian Spa - a lovely great moose of a product! We were hesitant about an inflatable spa, so went for one that seemed to be more robust that usual. The Canada Spa Grand Rapids did not disappoint. It is tough and instills confidence in its longevity, but good looking and easy to install. It has the big advantage of being deeper than other tubs, so covers your shoulders, if you don't use a booster seat. There is no need for one as the base is well padded and the seats tend to bob up to surface anyway. This model is only really big enough for 2 but is very comfortable for that number. The jets are great, very vigorous. The aromatherapy add on one came free in the offer is very nice to have. You need to buy the start up chemicals kit - easy to use videos online show you what to do if you have trouble following the straightforward pack instructions and we got it set up and ready to use the next day. It has added to the quality of life greatly. Delivery was prompt and efficient too, from within the UK. Easy to set up, great value, suitable for 2 adults, but not in my opinion large enough for 4 adults, unless they sit cross legged! There is a person version. Lovely for relaxation and stress release in lockdown! All of the above good value only one negative is I think you would struggle to get 4 adults in let alone 5. For an infaltable it feels sturdy. Good qualty for the price. The folk who sell it know what there doiing so are able to answer questions on it. Skip to main content. ed, its value goes down. Coin collectors prefer to have coins in as close to mint condition as possible. However, there In a previous blog we talked about the great American Money Experiment. In its infancy our country broke with the British currency system. In the fledgling United States Congress passed the Coinage Act which authorized the building of the United States Mint and created a brand new currency: the How Does a Coin Evaluation Work? When someone requests an evaluation of his or her rare coins, it is usually for a specific reason â€" an insurance appraisal, a division of assets, or to learn the value for the purchase or sale of a collection. The Franklin half dollar is a popular series to collect. These coins were minted between and and remain in demand today for many reasons, not the least of which is their relative affordability and the ease with which they can be obtained.
