Interior quality and fuel economy also leave much to be desired. Patrick Henry once famously declared, "Give me liberty or give me death. Frankly, it's barely worth considering since just about every rival SUV -- be it a commuter-friendly crossover or a dedicated off-roader -- is a better, more well-rounded vehicle. The problems start with the Liberty's underpowered horsepower V6. While sluggish acceleration is commonplace among compact SUVs, the four-cylinder engines found in models like the GMC Terrain at least boast good fuel economy as a trade-off. It gets even worse with the four-wheel-drive Liberty, which returns 17 mpg combined -- the same as a V8-powered Chevy Tahoe. One could argue that Chrysler's new V6 found in the Wrangler could help things, but the Liberty's issues don't end there. To call its interior "not up to par" would imply it's playing on the same metaphorical golf course as those it competes against. On the contrary, materials are hard and cheap, the look is drab, the seats are flat and the wheel doesn't telescope, just to name a few offenses. An upgrade to the sort of interior quality seen in the impressive new Jeep Grand Cherokee can't come soon enough. Now, it's true that the Liberty is a rugged compact SUV with the four-wheel-drive chops to get you way off the beaten path. In this way, the Liberty will look pretty good. Properly equipped, the Liberty has significantly more off-road capability than models like the Terrain or Honda CR-V and probably more than most buyers are ever likely to need. But if it's off-road potential you want, you're probably going to be better off with the Nissan Xterra and Toyota FJ Cruiser. They're typically a little more expensive, but they offer superior off-road capabilities, better on-pavement performance and nicer interiors. Plus, if you're looking for serious off-road potential, Jeep's own Wrangler is the more obvious choice. Ultimately, as much as we respect the Jeep Liberty for its off-road capability, we continue to have a hard time recommending it until it undergoes a redesign. The Driver's Convenience Group adds Bluetooth phone and audio connectivity, an auto-dimming rearview mirror, a compass and an outside temperature display. The Comfort Seating Group adds heated power front seats six-way driver, two-way passenger , driver memory functions and leather upholstery. The Limited includes all of the above optional equipment from the Sport along with inch alloy wheels, exterior chrome trim and an eight-speaker Infinity audio system. An available Tire and Wheel Group includes inch chrome alloy wheels. Every trim is available with a towing package, a panoramic cloth sunroof Sky Slider , a traditional sunroof, rear parking sensors and an upgraded sound system named Media Center that includes a touchscreen interface, DVD audio playback and 28GB of digital music storage. A Garmin-powered navigation system with real-time traffic can be added to the Media Center on the Sport. The Limited and Jet can be equipped with the Media Center , which is similar but features a Chrysler-sourced navigation system. The Jeep Liberty is powered by a 3. A four-speed automatic is the only transmission offered. Rear-wheel drive is standard and there are two different four-wheel-drive systems available, including the part-time Command-Trac and the full-time Selec-Trac. A properly equipped Liberty can tow as much as 5, pounds. The Jeep Liberty comes standard with antilock disc brakes, stability control, active front head restraints and side curtain airbags. Rear parking sensors are available as an option, but front-seat side-impact airbags are not even offered. In Edmunds brake testing, the Liberty came to a stop from 60 mph in a longer-than-average feet. The Insurance Institute for Highway Safety gave the Liberty its top mark of "Good" in the frontal-offset and roof strength tests. In the organization's side-impact test it earned the second-lowest "Marginal" rating. On the road the Jeep Liberty offers a tolerable if somewhat truckish ride quality. Its suspension clearly isn't well-calibrated for the street, resulting in sloppy handling with noticeable amounts of body roll. The 3. Leave the pavement behind, however, and the Liberty feels much more at home, offering the ability to take on surprisingly rugged trails. Those trails had better not be dark, though, because we've found the Liberty's headlights to be notably poor. Inside the Jeep Liberty you'll find a utilitarian interior design

made even more uninspiring with the use of cheap-feeling hard plastics. Front and rear seats aren't particularly comfortable and the tilt-only adjustable steering wheel may make it hard for some drivers to find a good driving position. Standard climate and audio controls are at least well-placed and intuitive, but the optional audio system can be fussy to use due to its small touchscreen controls. There's also a good amount of road and wind noise, which can grow tiresome on longer drives. The available cloth Sky Slider oversize sunroof is a unique feature and seals out the elements better than you'd expect. The cargo hold offers an average amount of space, with I went from a Ford Truck to this Jeep Liberty 3 years ago because I wanted a reliable 4wd that could sit 4 people comfortably with a 5, pound towing capacity. I bought it a year old with 29, miles. I too was skeptical because of the expert reviews, however the customer reviews were very positive and I was impressed on my test drives. Now that I have owned it for several years, this is by far the best vehicle I have ever owned. I have towed extremely heavy trailers and put it in places that I should not have been able to drive away from. It has literally saved my life a time or two. I have never had one thing go wrong with it. The 4 speed auto is ancient, but it is reliable. This was made to be a sport utility from the ground up. Only complaints I have: The backseat leg room is somewhat cramped, the front foot leg room is cramped, and the trip button on the steering wheel oddly only works half the time, however I just use the other trip button on the dash. Also, the fuel mileage but as stated earlier, it is expected. Here are my fuel mileage numbers: Average Just understand what you are sacrificing in return. I recently purchased the Liberty Jet edition. Over the past two weeks that I have had the vehicle, I have found it to exceed my expectations from what I have read in other reviews on line. I bought it based primarily on an emotional response - I had a Jeep Liberty that finally died. I was looking at other vehicles and then test drove the Jet. If you are looking for a vehicle that has the power, capability and look to plow through rough terrain, but then transition nicely to a luxurious ride, the Jet does it in spades. The seating is comfortable, the cabin well equipped and understandable and it really performs on and off the road. No complaints thus far. Being 55 years old I have purchased many, many vehicles the Jeep Liberty is by far the best most logical I have ever purchased. The MPG is alot better than advertised, the ride is alot smoother than I expected ,the exterior and interior styling is great. This Jeep is built to last it will most likely last me the rest of my life. I test drove every mid size SUV on the market and found that no other manufacturer comes close to the Jeep Liberty. I let some friends take it for a trip they loved it and are now in the market for one. The Liberty was a great surprise and I am very happy I bought one. We just bought a Trail Rated Liberty with the full sunroof about a month and a half ago. We are 2nd owners and we bought it with about 35k on it. This thing is built solid. Drives smooth and has done decent on gas. Below 80mph increases the mpg's. Best we have calculated was just under 22mpg. The transmission in this thing is incredibly smooth. We love the exterior design and the way it drives. The full sunroof is really cool and a neat feature. I will say this; I am 6' tall and weigh about and the driver's compartment does feel 'snug', so if you are much bigger than me, ya might want something a bit bigger. Overall, we are thrilled with it. I'm 47 and my wife is 6 years younger. Interior is a little chincey, but hey, it's a Jeep not some foo-foo high end suv. If you get one of these, I think you'll be glad you did, just like we are. We have taken several more road trips including a few from Boise, Idaho to Trego, Montana, where we now live. The Jeep is performing well and now that we drive a mile down a dirt road to get into and out of our new house, we are really pleased we have it. We are looking forward to our first north woods winter in it. Write a review. See all 33 reviews. Consumer ratings and reviews are also available for the Jeep Liberty and all its trim types. Overall, Edmunds users rate the Liberty 3. Edmunds consumer reviews allow users to sift through aggregated consumer reviews to understand what other drivers are saying about any vehicle in our database. Edmunds has deep data on over 6 million new, used, and certified pre-owned vehicles, including rich, trim-level features and specs information like: MSRP, average price paid, warranty information basic, drivetrain, and maintenance , features upholstery, bluetooth, navigation, heated seating, cooled seating, cruise control, parking assistance, keyless ignition, satellite radio, folding rears seats ,run flat tires, wheel type, tire size, wheel tire, sunroof, etc. Edmunds also provides tools to allow shopper to compare vehicles to similar models of their choosing by warranty, interior features, exterior features, specifications, fuel economy, vehicle dimensions, consumer rating, edmunds rating, and color. Is it better to lease or buy a car? Ask most people and they'll probably tell you that car buying is the way to go. And from a financial perspective, it's true, provided you're willing to make higher monthly payments, pay off the loan in full and keep the car for a few years. Leasing, on the other hand, can be a less expensive option on a month-to-month basis. It's also good if you're someone who likes to drive a new car every three years or so. Popular searches.
