Lamp cluster body

For those of you who would rather not worry about so many pieces, we offer lamp cluster designs with sockets as well. One less step for you to worry about means getting to your finished product faster. Available in a number of shapes, sizes, and finishes, finding the right part is easy. We just need to know the number of lights the fixture will need, the preferred direction of the lights pointing up, down, to the side, etc. With this information, we can slim down the search to a few possibilities to make the selection process much less intimidating. If you need a classic look, we recommend brass because it has a timeless shine that will fit in with most antique designs. Our brass parts come in polished, unfinished, and antique finishes depending on how bright or muted you prefer the color to be. For new-age and modern designs, we have finishes available in bronze brown with a nice shine and nickel plated silver in color. These colors are more suited to fixtures that require neutral tones for a modern design scheme. We are proud to provide their wide array of lamp cluster styles and lamp cluster bodies to consumers who need replacements and do-it-yourselfers looking for great quality parts. Our friendly and knowledgeable staff will do everything we can to make sure you find the right part for your lighting fixture as quickly and efficiently as possible. Take a few steps to finally fixing that broken lighting fixture or start making one of your own today. Come by the store or shop on our website to see all the parts we have for you. It's never too late to fix an antique, so let's get started. Categories Menu. Account Cart. One part that is vital to proper fixture construction is the lamp cluster. If you're familiar with do-it-yourself lighting assembly, you know this piece is important and can make or break your design. If you're new to lighting fixtures or just need a replacement, our company has a wide selection of lamp cluster bodies to get your fixture back on track. Displaying products 1 to 36 of 76 total. Lamp Making Parts and Hardware Find a full line of antique lamp parts, porcelain light sockets and brass tubing for the lamp maker and hobbyist. We can show you how to rewire lamps. Featured Products. Browse ALL Categories. Caution: Electrical Hazard! You must remember that before you attempt to fit, replace, or remove any of the parts on an electric lamp or fixture you must always disconnect or unplug the lamp or fixture from any source of electricity before you begin. Simply turning the lamp "off" will not protect you from an electrical shock. If you are not sure how to safely disconnect your lamp or fixture from its electrical source, you should contact a licensed electrician or your local power company for further instructions. There is a vast difference in quality of sockets. The shell is threaded on both ends. The captive ring slips over the cap, and threads onto the top of the shell after it is wired. Couldn't be easier! If you've ever had to disassemble a regular snap-in socket, you'll really appreciate this feature. The old stand-by "regular" snap-in socket is fine, until you get ready to take it apart. Nine times out of 10, you'll ruin the socket trying to pry off the cap or when applying pressure where it says, "Press Here". The Deluxe socket solves this problem, and is well worth the price difference. The Deluxe sockets are far superior to the snap-together style on a bridge lamp, where the weight of the shade is hanging off the end of the socket. Click on pictures to enlarge to full size. A lot of old lamps have sockets that have threads on the outside. These are called Uno sockets. Now they are widely used only on bridge lamps, where the shade hangs downward. The Uno fitter on the shade is threaded on the inside, and screws onto the end of the socket. Uno fitters on many shade frames are recessed 1" or 2", which helps hide the socket itself. This is good if you have a pull-chain type socket and using a fabric or hardback shade. If you're using a Glass shade on a bridge lamp, we recommend a turn-knob socket, or a push-thru switch. If you've ever had a pull-chain snap back and break a glass shade, you'll know why we do not recommend pull chain socket with a glass shade. A Uno fitter flush at the top of the shade provides easier access to the on-off switch. Click on picture to enlarge to full size. Click on pictures to enlarge. Click on

We accept credit card payments directly. Call us first to determine shipping and insurance charges. Cluster Assemblies for two or more lights Click on pictures to enlarge to full size. For 3" fitter 10" diameter reflector bowl. Takes Mogul socket. Takes standard socket. Flicker Flame Bulbs for Candelabra Socket we do not carry these - check your local hardware or lighting store. Comes with insulator as shown above. Candelabra sockets shown above. Prices subject to change! Adds to your order. This large three-whole cluster body allows you to use the 0-cap hole for a single-tier fixture or add up to three holes for additional fixtures. Learn more about your style and personalization options here. This chandelier cluster body is available in a multitude of different finish colors to ensure you can create a fixture that matches your current decor and personal aesthetic. Choose from finishes like polished copper, brushed nickel, matte white, and more! Keep in mind that some of our finishes, like the raw metal finish, were developed so they can oxidize and add character to your fixtures. We recommend you use it for industrial style applications. You can also clean and sand them to paint them with a unique finish. Color Cord Company strives to be a one-stop-shop solution for all your lighting fixture needs. Visit our online store to customize your own creation or shop ready-made products for easy installation. Looking for a little guidance? Table lamps and chandeliers can provide a lot more than light. These decorative pieces are often chosen based upon their appearance. They can catch the eye of anyone who walks into the room and they add a bit of classic and old-world taste to any room of your home. However, when it comes to older lighting fixtures, it can sometimes be a bit difficult to find lamp parts and get quality repairs. We understand this issue and specialize in providing quality lighting parts and repairs. Standard furniture stores and hardware stores are often lacking in terms of rare and hard to find parts for older lamps. We seek to provide a high level of quality that makes us a top choice when it comes to needs of this kind. Now you can display your cherished lighting fixtures without worry, as any lamp part you need can be found in our impressive collection. Decades of networking with antique dealers has enabled us to acquire an impressive inventory including plates, chains, tubes, columns, bases, connectors, bases, and more. Our specialty in the area of contemporary and antique light parts may give us a distinct position in the indu
