It is a sturdy vehicle designed to seat passengers in the rear seating row. With an array of different features, this is one reliable car that boasts a seven-passenger capacity and tons of cargo space. It is a reliable car that can handle impressive interior and exterior loads. This makes it a perfect vehicle for hauling trailers. You just need a suitable trailer hitch. In this article, we have come up with some of the best trailer hitches for a Honda Odyssey. If you are interested in installing one, you should give this article a thorough read to know about different products and choose the one that suits you the most. A trailer hitch is a device that is installed at the rear end of the car for towing purposes. It is an important part of a vehicle. Realizing this, most of the cars produced these days, are equipped with trailer hitches at the factory. Those produced without it have a mounting place for it. If your car lacks one, you can get one for yourself. Among the many purposes a trailer hitch serves, some are discussed below. The basic purpose of a trailer hitch is to attach a trailer on itself for towing. Such items include furniture, building materials, agriculture tools, etc. You can easily transport such things in a trailer if you have a trailer hitch installed in your car. You can use it to tow camping and utility trailers too. Accessing the rear of a high vehicle is always difficult. A trailer hitch can install a mounting step on itself for you to step on. It gives you easier access to the trunk or bed of your vehicle. Transporting your bike, especially after a messy ride is not easy. Doing so with a dirty bike ruins the interior of your car. A trailer hitch mounts a bike rack onto itself so you can safely carry your bulky, dirty bike outside your car. Trailer hitches come in all sorts of sizes and towing weight capacities. Since it also serves a great number of purposes, you will surely benefit from investing in it in the long run. Some of the advantages of a quality trailer hitch are discussed below. A quality trailer hitch is far more reliable than its cheaper counterpart. Made from the highest quality materials with a strong and durable build, it is far more superior in towing loads. Investing in a quality product means that you have relied on it for your car that it will not hinder its performance in any way. Investing in a high-quality trailer hitch means that you have a product that is much better at performing the tasks it is assigned to, be it towing a trailer, carrying a bike or a boat, providing a mounting step or protecting your vehicle from accidents. It does everything that is asked from it in a better and satisfying manner. This is something a cheaper product cannot accomplish as effectively. Cars are more of a utility than a luxury. They are a bare necessity that is with you during the thick and thin of your life. So when you are buying accessories like a trailer hitch for your car, you should invest in a quality one because they are made to last. Composing of fine materials and excellent craftsmanship, a quality trailer hitch lasts much longer than a cheap one. So you have decided on the trailer hitch that you want to equip your Honda Odyssey with. Installing it does not have to be a tedious task. You can do it yourself within 15 to 45 minutes. Here is a comprehensive guide to installing a trailer hitch on a Honda Odyssey. Start by raising your car at the height you are comfortable working at. You can use a vehicle lift for this. Now remove the driver side appearance panel by taking out the pushpin fasteners and the bolt. Take out the pushup pins below the rear end and unscrew the fill-up screws holding the underbody paneling in place. Now open up the hatch and remove the two fasteners located below the tail light area. Remove the two bolts located in each corner of the bumper beam to take it off. Tape a washer on each of the bumper beam bolt holes. Secure them with tape on all four holes, two on each side, to work as spacers. Tape it in position. Repeat on the passenger side too. Align your hitch with the spacer plate on both sides. Screw it on with a large bolt fitted with a conical teeth washer facing up. Raise the bumper beam and align all the holes together. The holes on the vehicle body, hitch and bumper beam should line up straight with each other. Now bolt in the hitch and the bumper beam with a smaller bolt and a conical teeth washer facing the bumper beam. Secure all four bolts. Mark out the area on the underbody paneling that needs to be cut for the recess of the hitch to poke through. Do this according to the instructions provided in the hitch manual. Lift the paneling back in position and install the push pins and screws to secure it back in place. Reinstall the driver side appearance panel and the mud flaps that were taken out earlier to complete the process. If you have any confusion understanding the process described above, refer to the video account of the process given below. Installing a trailer hitch on your Honda Odyssey is a great decision. The Honda Odyssey has been in development by Honda since way back in This all utility minivan has seen a surge in popularity, persisting today, thanks to its multi-functionality. The strength of the Honda Odyssey and its large amount of seating room makes it perfect for hauling people as well as trailers or other heavy burdens. For many folks, the next reasonable question is: what sort of hitch do I need? Before we break down the best hitch for your needs, we figure that we better show you the two styles you will most likely be running across. Fixed Tongue Hitch The fixed tongue hitch is no longer commonly used due to how problematic they can be when not being utilized. A fixed tongue hitch is exactly what it sounds like a permanently fixed installation that can be used to haul some serious poundage. These are installations for the duration of your use of the vehicle unless you feel like going through the rigorous process of tearing it down every time you are done. Receiver Hitch This is the hitch you will see bought and used on pretty much every Honda Odyssey you run across. You can install this type of hitch on either end of your vehicle for hauling or being hauled. Curt fits into the Class III tow ranking, which means that it can handle up to 8, lbs of pull weight. If you need to pull more than what the Odyssey typically would allow, you can look into getting a weight distribution system mentioned above. Whatever you are hauling, you need to make sure that it fits into the Class III weight limit. We are personally fans of products that you can receive, install, and use without having to go through a whole ordeal. Furthermore, if craftsmanship is vital to you, you will be happy to know that this USA made receiver hitch is made with both safety and durability in mind. The breezed its way through safety tests SAE J that are performed rigorously before they are ever allowed to hit the market. The hitch has been expertly welded to fit the Odyssey perfectly. The receiver hitch is made out of steel, and it has a thorough, solid finish. The first coating that is fired onto the is the Bonderite liquid, followed by a weatherproof black powder finish. What you end up with is a beautiful hitch that is as strong as it is pretty to look at and will last a lifetime. When you order the Class III Hitch Receiver, you will end up receiving a 44 lbs package that includes a limited lifetime warranty, mounting hardware, and instructions on how to install the device. As we said above, the hitch ball and ball mount will need to be acquired separately, though they are not large purchases. With the non-drilling, non-welding installation, you should have your receiver hitch ready to go within only a few minutes of beginning the installation process. What can be better than an easy to install, quality product? While we would place the following hitch options a tier below the , they are still quality in their own right. The is made out of solid welded steel, and it is custom-made to fit the Honda Odyssey. The product weighs 44 pounds, and it is easy to install, with most users getting the hitch completely installed in under an hour. While the Reese Towpower may not be as heavy-duty as the options listed above, it makes up for this with ease of use, ease of installation, and long-term durability. The Reese Towpower is rigorously tested for safety before hitting the market, and it is made of fully welded steel with a protective coating. This pound hitch is easy as can be to install and even easier to use once installed. Toggle navigation Hitch Review. Privacy Policy Contact Us. Toggle navigation Menu. Contents 1 Types of Hitch 1.
